

FLOCKING FOR OBJECTS

Manual Flocking Device - mod. EASY FLOCK

The **Manual Flocking Device mod. EASY FLOCK** is a flocking unit for samples and limited productions.

It can be supplied in three different versions:

- Unit with built-in electrostatic generator, fed by three 4,5V batteries (1)
- Unit with built-in electrostatic generator, fed either by batteries or by 220V power supply (2)
- Unit fed by **Electrostatic Generator mod. T25P** (3) (see catalogue).

In addition, each **EASY FLOCK** can be equipped with a different flock distributor, choosing from three available diameters: 60, 120, and 180 mm. (4)

FLOCKING FOR OBJECTS

Flocking Group for Rotary Printing Carousel - mod. MULTIFLOCK/LAB

Up to three **EASY FLOCK** units can be connected to the **Electrostatic Generator mod. T25P** through a special commutator, and activated by the operator in succession. This configuration is especially indicated to work on rotary printing carousels to flock t-shirts, sheets, panels etc..., using multiple colors. Each **EASY FLOCK** can in fact be loaded with flocks of different colors.
