

FLOCKING FOR OBJECTS

Cleaners for Panels/Sheets/Pre-cut Garments - mod. PFA-PFS-PM

The **Vibrating Cleaner for Sheets mod. PFA** consists of:

- A frame made of welded profiles
- Suction mouth with variable opening, to adjust air intake
- One suction fan, connected with filter sleeves for flock recovery.

Cleaning of exceeding flock is obtained through vibration of the sheet, after it has been introduced in the appropriate opening located on machine front.

The **Rotating Brush Cleaner for Panels mod. PFS** consists of:

- A frame made of welded profiles
- Two opposed rotating brushes
- One suction fan, connected with filter sleeves for flock recovery.

The **Vibrating Cleaner for Pre-cut Garments mod. PM** consists of:

- A frame made of welded profiles
- Suction mouth to adjust air intake
- One suction fan, connected with filter sleeves for flock recovery.

Cleaning of exceeding flock is obtained through vibration of the pre-cut garment, after it has been introduced in the appropriate opening located on machine front.

TECHNICAL DATA

Useful width	to be agreed upon
Power supply	400 V/50 Hz/three-phase
Installed power	2 Kw
