

SECOND HAND MACHINES AND LINES

FLOCKING LINE FOR BIG DIMENSIONS OBJECTS as per enclosed descriptions and drawing no. C1-1269/F and pictures

OPERATING SYSTEM (RELATIVE HUMIDITY AND TEMPERATURE CONDITION CONTROLLED BY AUTOMATIC CLIMA SYSTEM)

One or two operators place the object to be flocked on the foreseen holder.

Object holder is sliding over rails. The first station is the cabinet for coating glue, the second is the flocking and pre-cleaning cabinet. Finally, the holder goes out of the rails and manually put into an oven for drying. After drying the holder is fixed back into the rails for final cleaning.
